Unfortunate but understandable.

Thanks,

Duane Newell

Subject: JC Hunt Site (Wolf Creek Pass)

Duane/Steve,

We had to postpone the sampling up at the Wolf Creek site earlier this month due to CDOT paving project that had just started. We were hoping to be able to work in with the paving contractor and work under their traffic control plan to gain some efficiencies and save some cost. After conversation with the contractor, we are concerned that they may have paved over some of the wells. I have a staff member going to Alamosa today to perform some O&M on a remediation system and plan to have him run over to the site near South Fork and get a visual on our monitoring wells and determine if or how many of our wells they may have paved over. We will need to know status of the wells and determine if we are going to have to locate, uncover, and raise the well boxes. The contractor has asked us not to do anything until they complete their paving in early September and then if we come over, locate the wells, dig them out and raise the boxes, they will patch the asphalt. I will keep you guys in the loop once I hear about status of the wells.

Scott
